

**Idea: Devhub is a drop-off service for app**

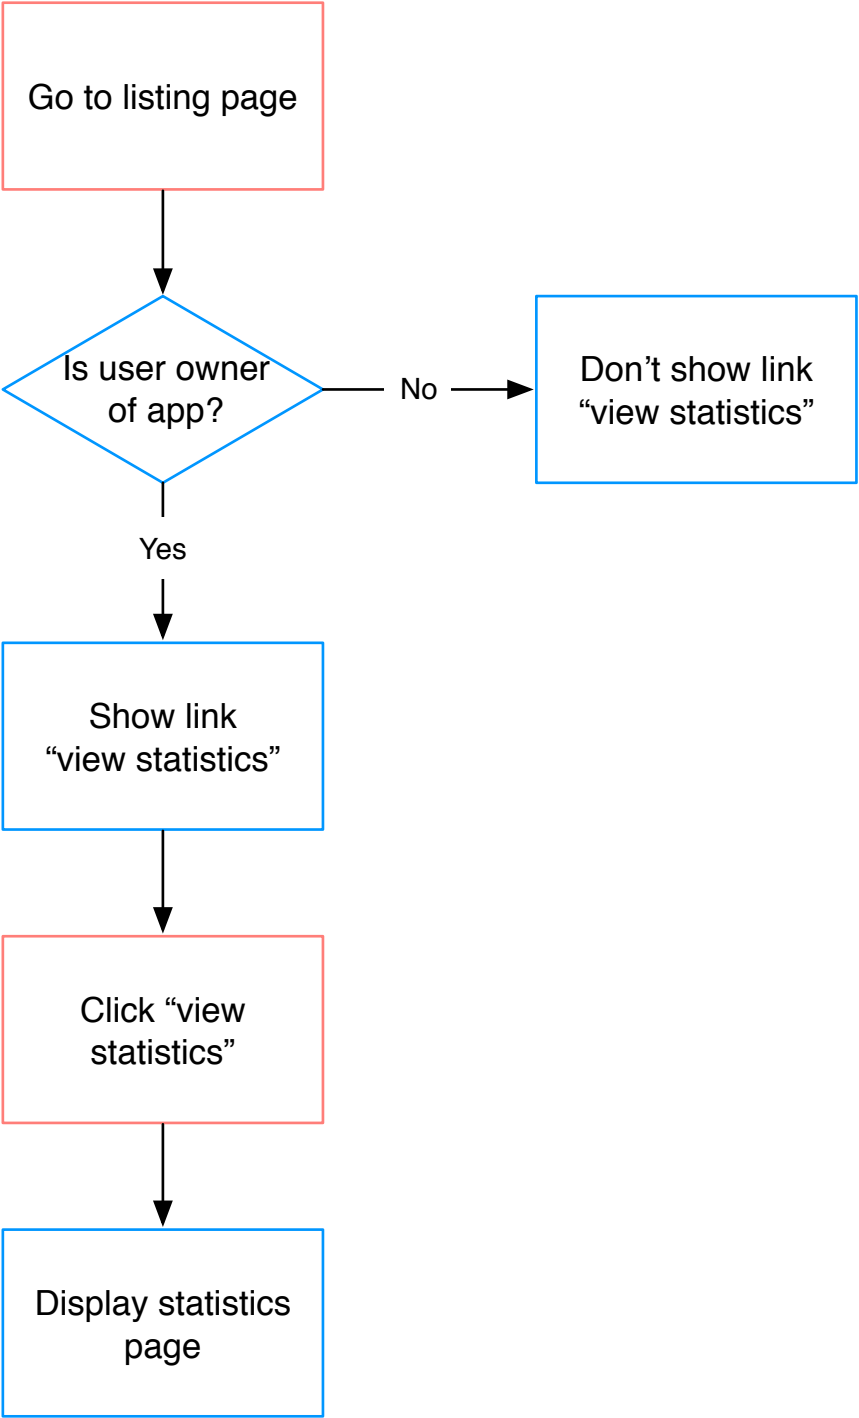

# Task 1: I want to get my app into the Marketplace

# Task 2: I want to update the description of my app

# Task 3: I want to see how many times this app has been installed

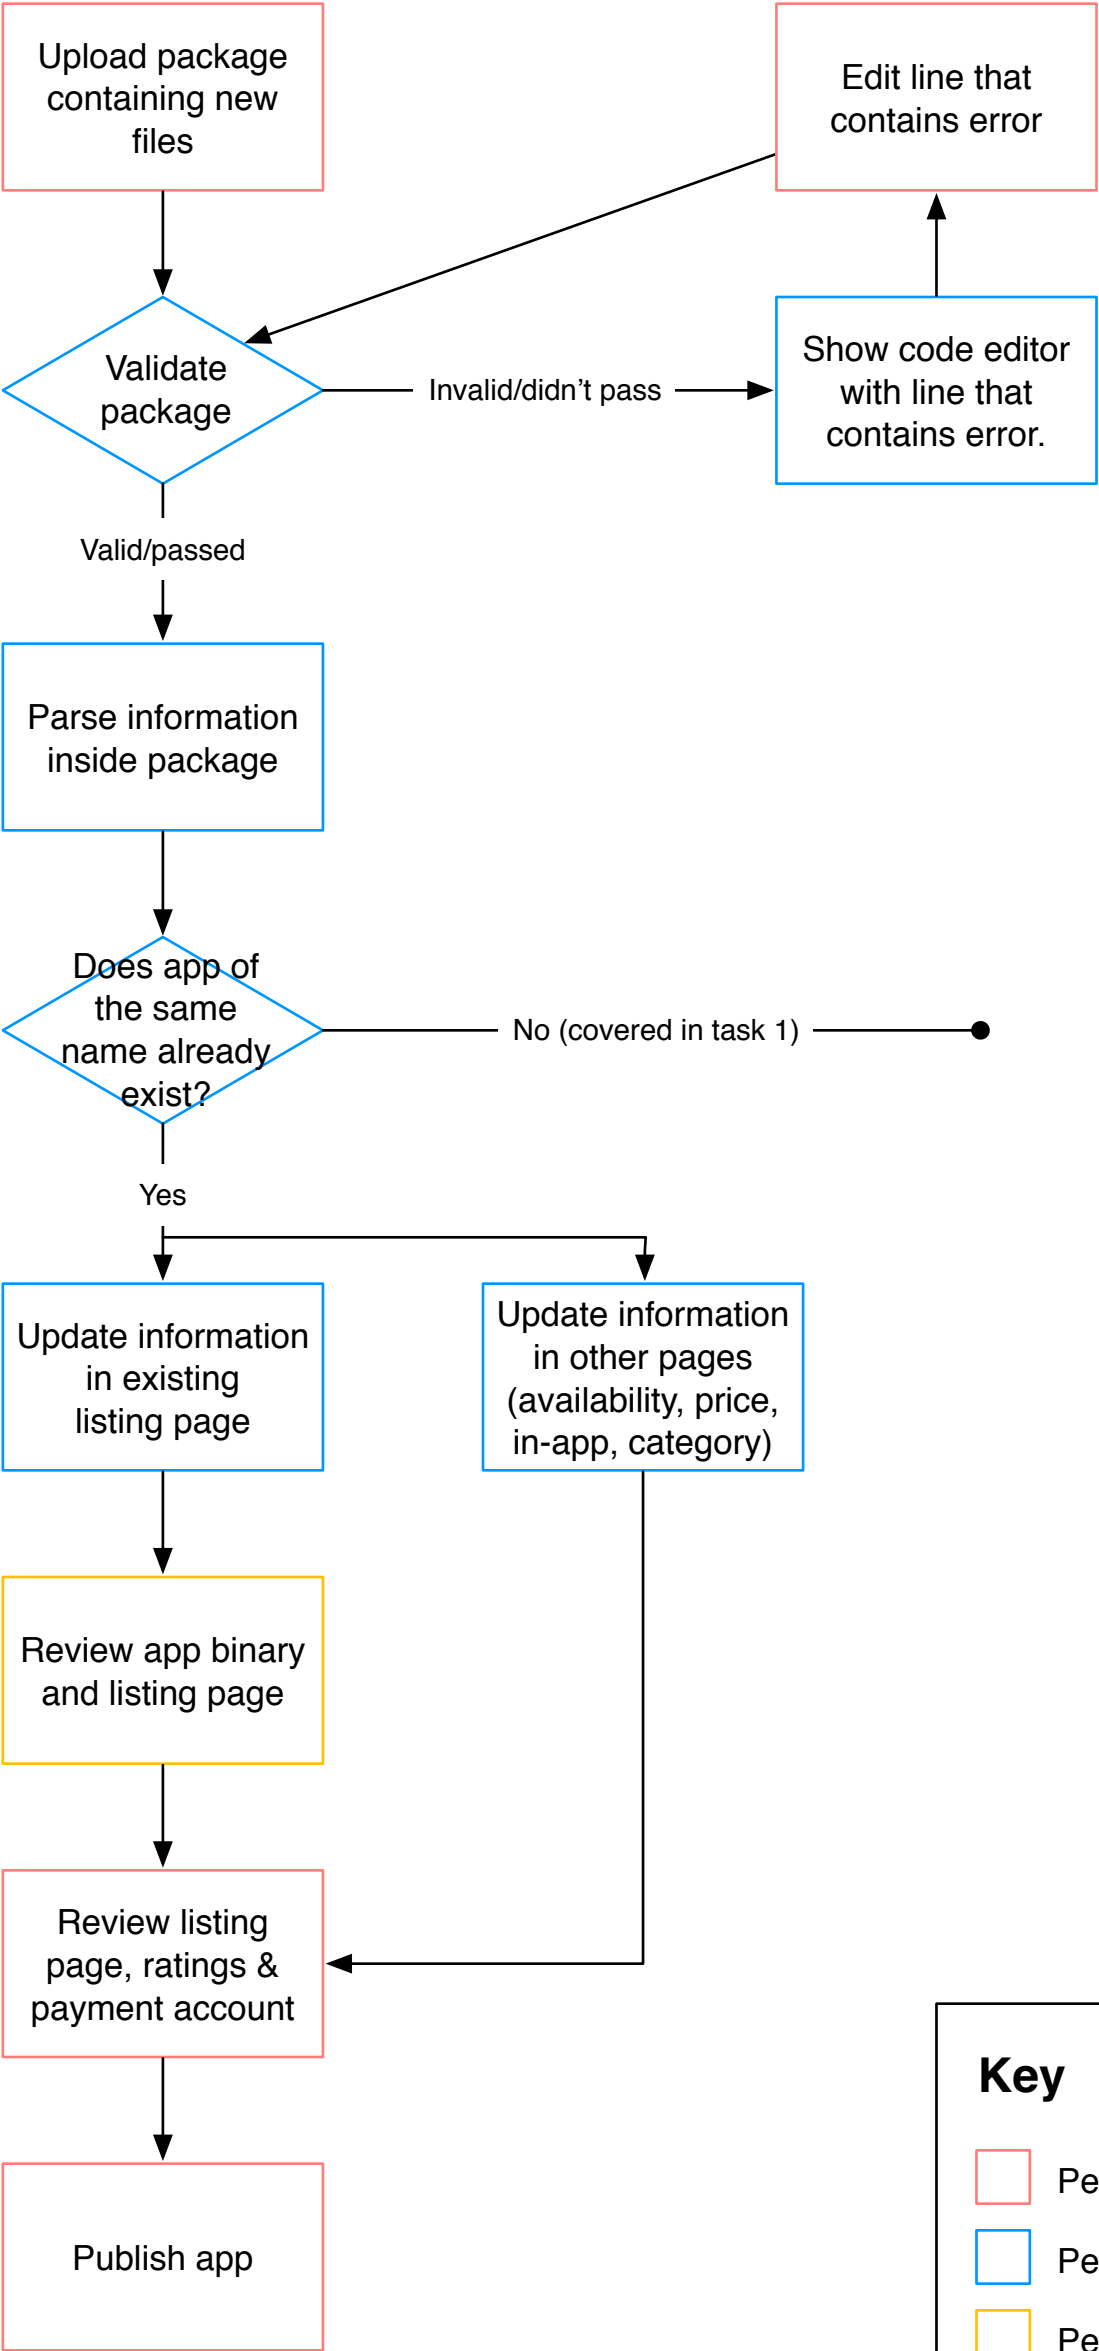

**Key**

Performed by developer

Performed by system

# Task 4: I want to publish a new version of my app

**Drop off**  
Package must contain all information:  
availability, price, in-app, category,  
privacy policy, homepage, etc.

**Pick up**

**Key**

- Performed by developer
- Performed by system
- Performed by reviewers
